Introduction to OCC

Welcome to Operations Command Centre

Operations Command Center, or OCC, is the start of a journey toward **smarter, more connected operations**.

With each new feature, it brings **data, insights, and actions into one place** so teams can **stay aligned, act faster, and make confident decisions**.

Powered by AI and machine learning, OCC is being designed to help teams **spot issues early, reduce manual work, and move away from scattered tools and spreadsheets**. This is just the beginning, so keep looking out for more.

How does OCC empower you?

Stay aligned

Keep all stakeholders on the same page with a unified view of operations.

Act faster

Receive smart notifications that surface only when they matter most, enabling timely responses.

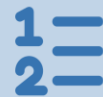

Make confident decisions

Leverage early signals and predictive insights to anticipate risks and take proactive action.

Prioritize your day

Manage your day with task management to focus on impactful work

Reduce manual work

Automate routine tasks and eliminate the need for scattered spreadsheets and disconnected tools.

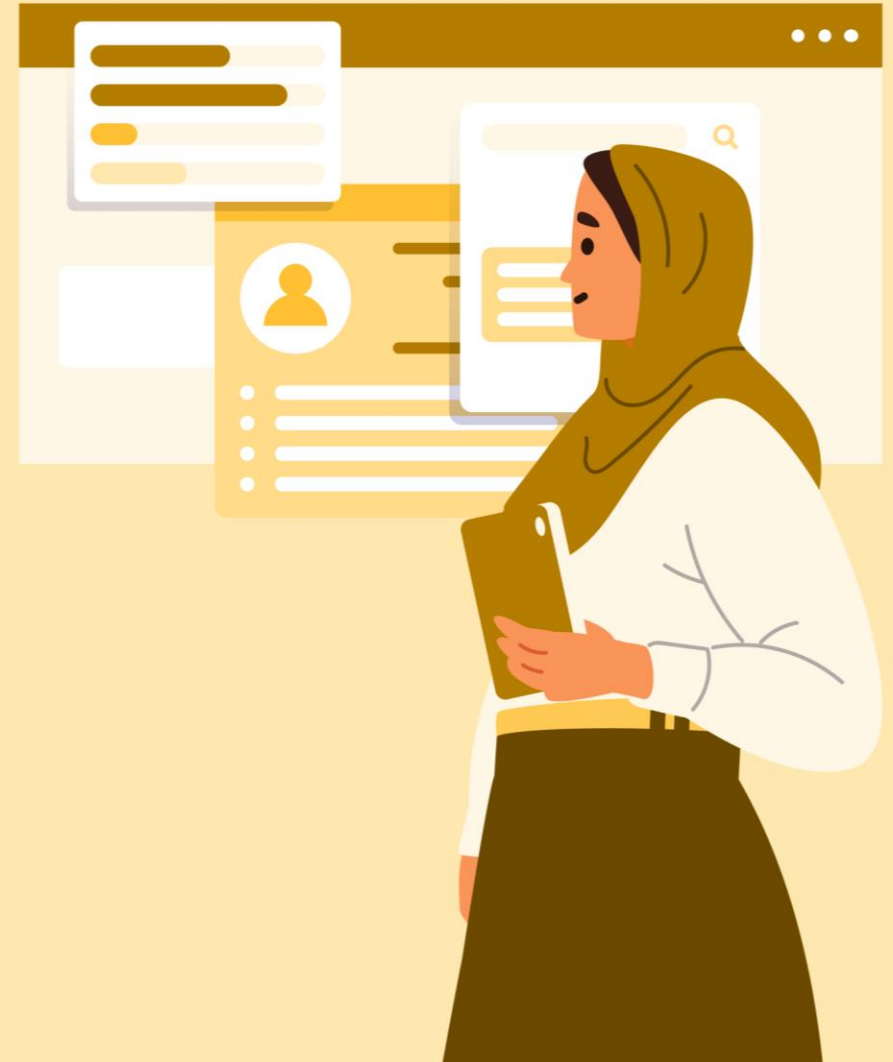

Access everything in one place

From reports, apps to integrating (linked) with ERPs , OCC brings it all together for seamless navigation.

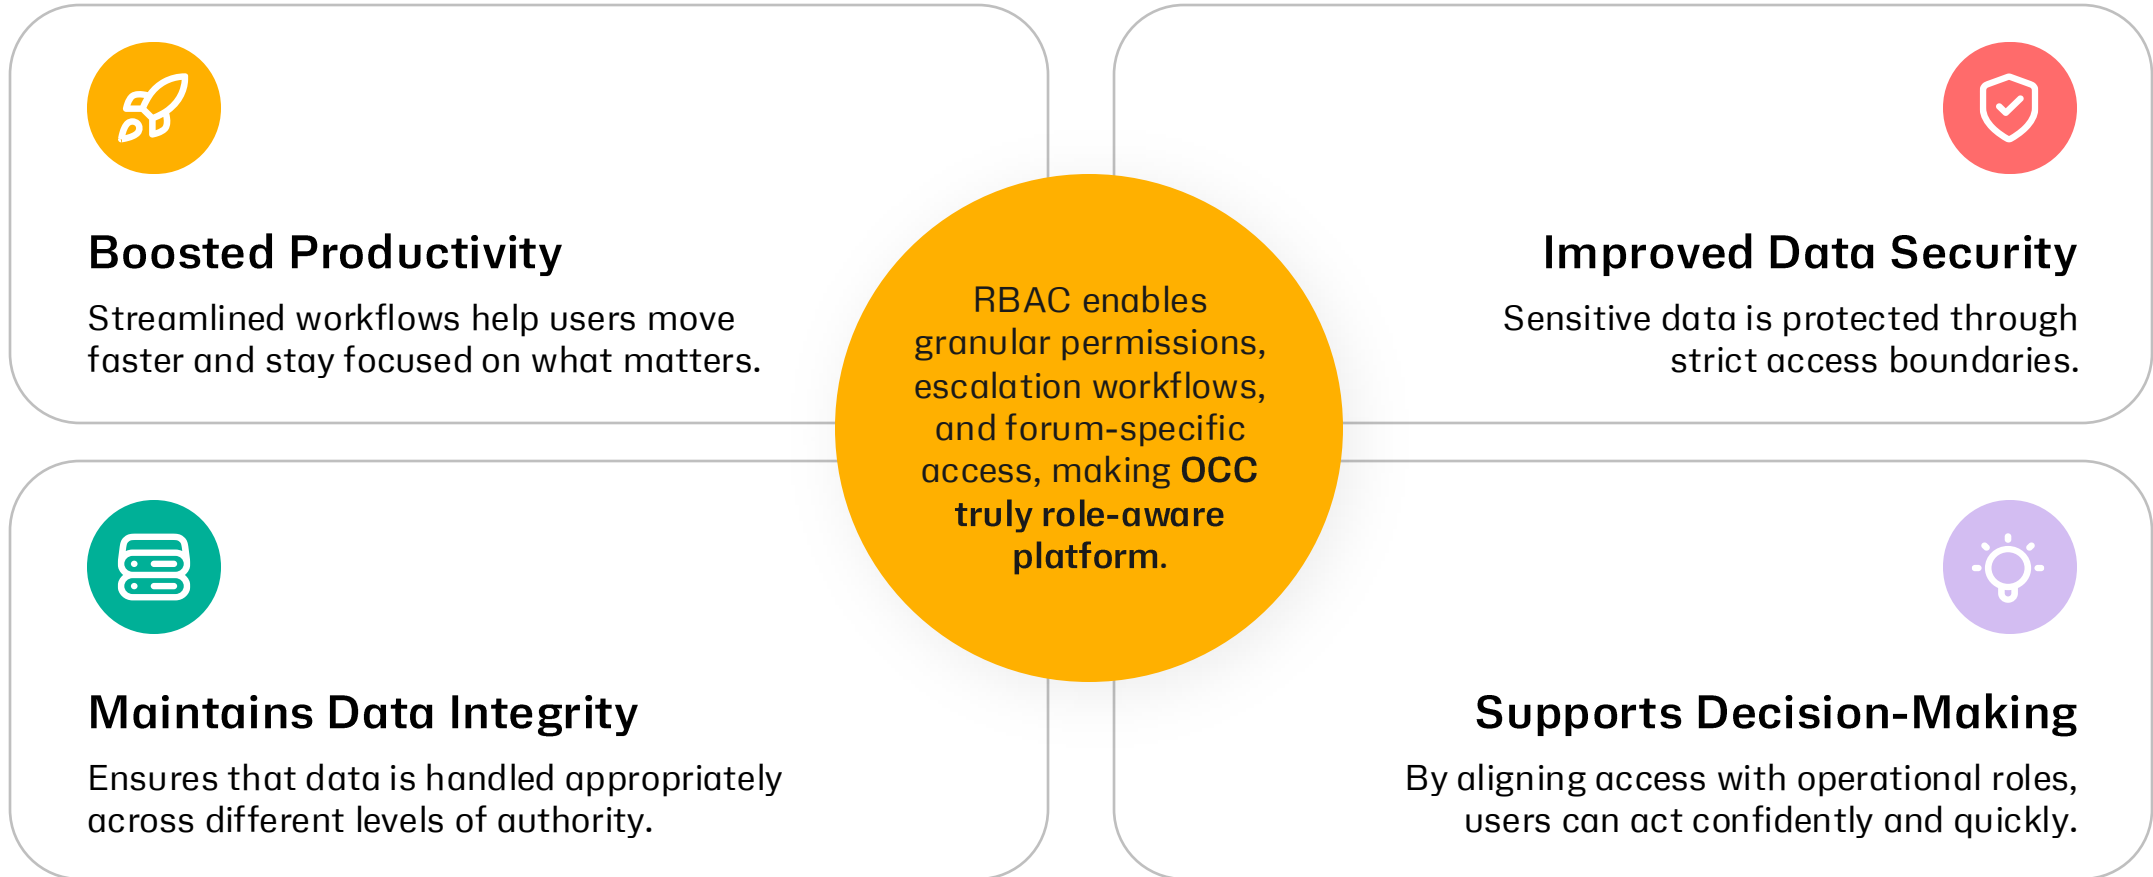

02

Role-Based Access

Introduction to Role-Based Access

Role-Based Access Control (RBAC) is at the heart of OCC's personalized experience. It ensures that every user whether an operator, planner, leadership or any business user gets access to any and every information required for his/her daily work.

Key Features of Role-Based Access

Beyond basic access control, OCC's Role-Based Access system introduces advanced features that empower users and administrators to manage roles dynamically and with greater precision. These capabilities ensure that access remains relevant, secure, and adaptable to evolving operational needs.

Dynamic Role Structures

Supports primary, secondary, and delegated roles to match real-world responsibilities and coverage needs.

Request Tracking

Users can monitor the status of their role requests for transparency and accountability.

Tailored Access

Roles come with automatic access to a predefined set of functions, reducing setup time and ensuring consistency.

Self-Service Controls

Users can edit or delete their role requests without admin intervention speeding up access provisioning.

Role-Based Access Explained

Why Role-Based Access?

Role-based access is designed to give you a tailored experience, bringing together the tools, workflows, and content you need, all in one place so you can work more efficiently.

There are two kinds of roles:

Primary Role

Your main role, defined by your responsibilities within Kenvue.

It provides access to:

- Relevant teams
- Assigned tasks
- Specific workflows
- Essential tools

Purpose:

Enables you to perform your core duties efficiently.

Secondary Role

An additional role for support-related access.

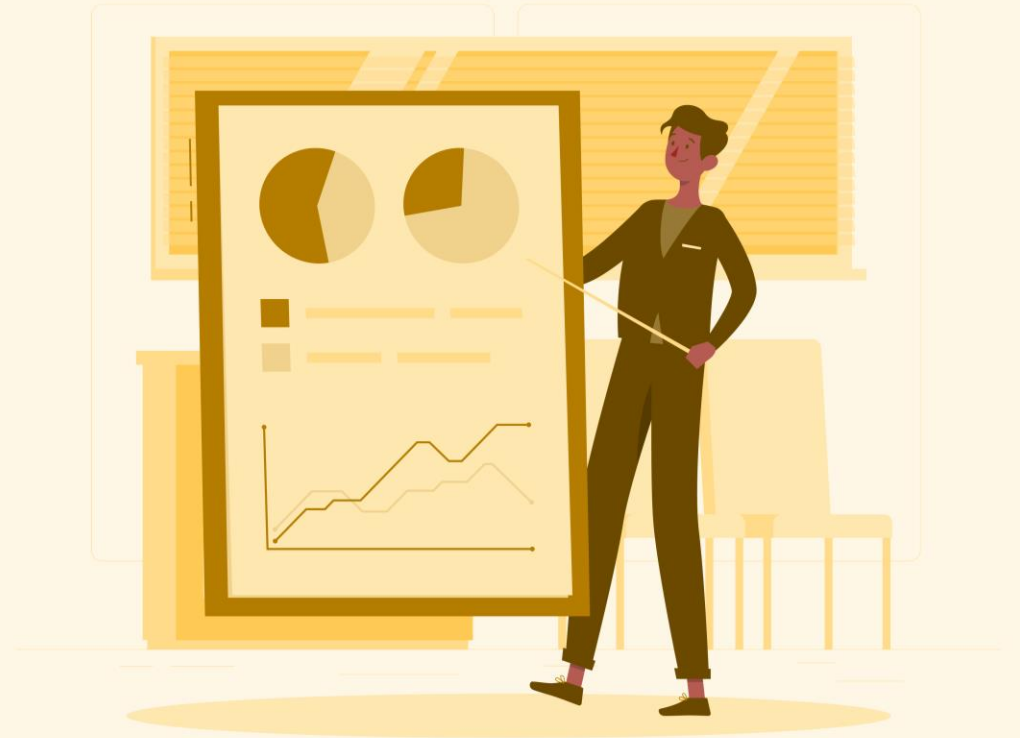

It offers:

- Broader visibility
- Supplemental tools
- Cross-functional insights

Purpose:

Empowers informed decision-making with a holistic view beyond your primary scope.

How to get started?

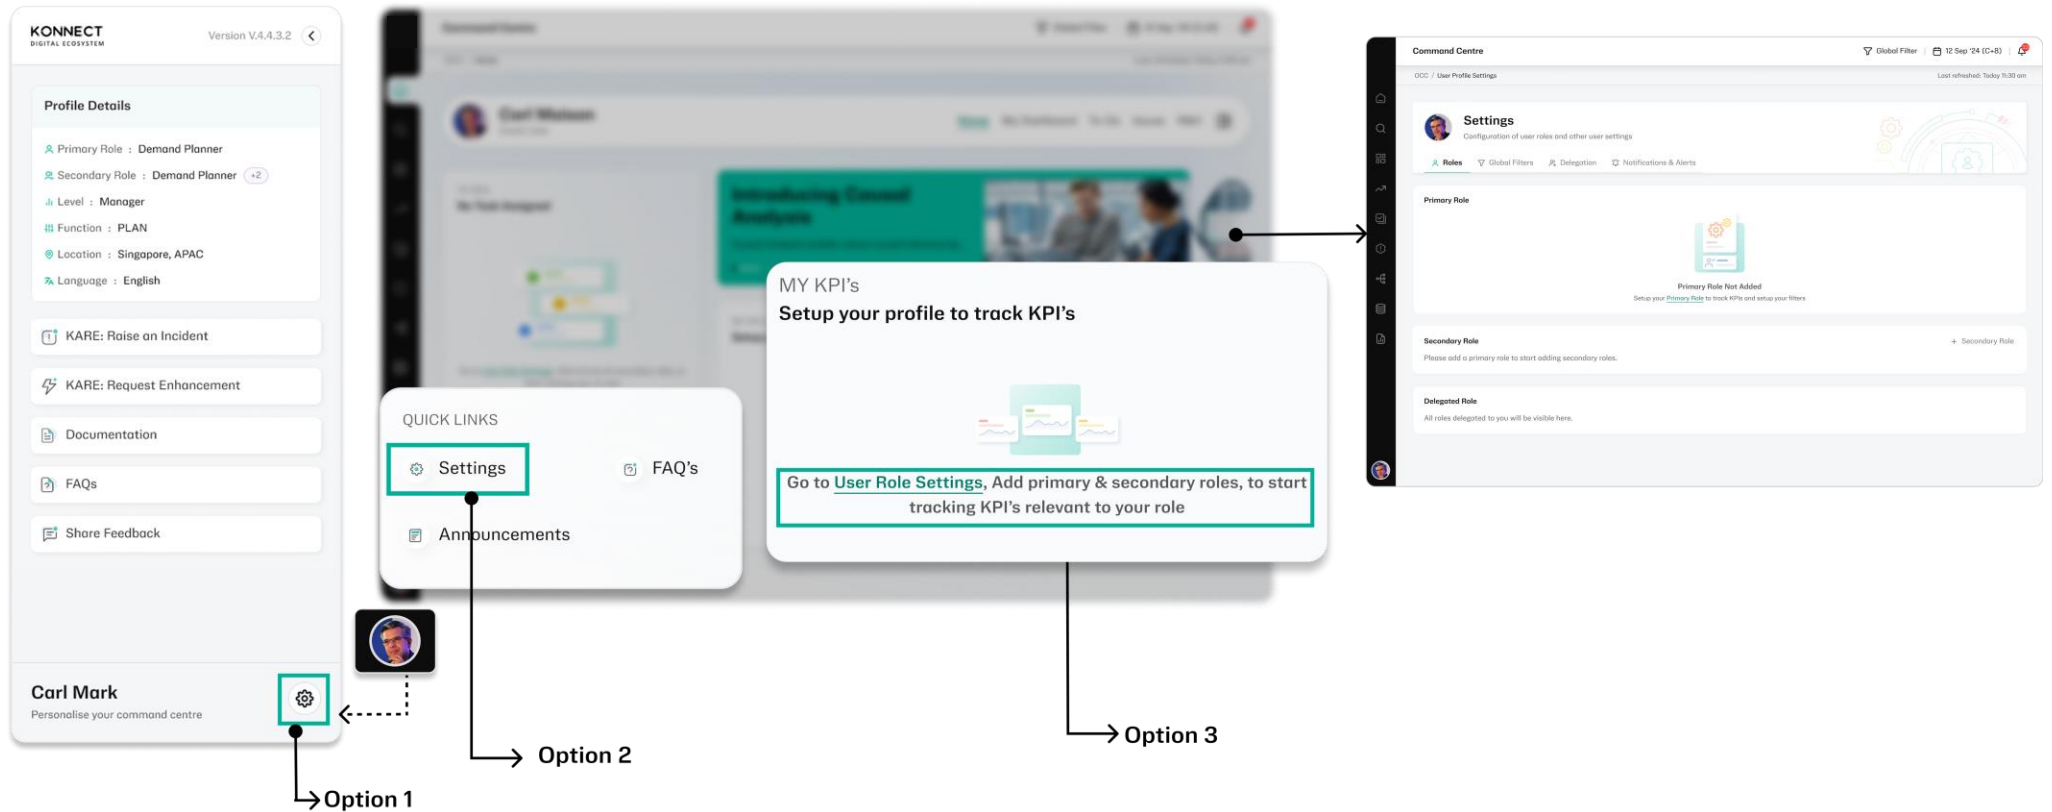

Step 1: Enter the User Profile Settings

To access personalized controls on OCC, you must first set up your user role. You can access the User Role Settings through any of the following three paths:

Option 1: Profile Section → Click the Settings icon

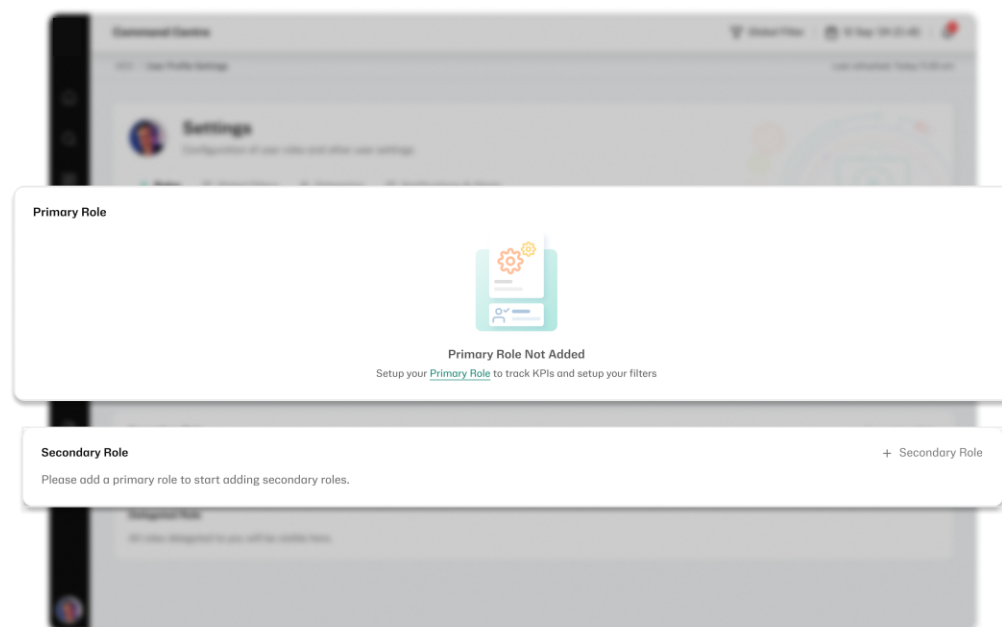

Option 2: Quick Links Section → Select Settings

Option 3: MY KPIs Section → Choose User Role Settings

Step 2: Setup your Primary and Secondary Roles

1. Go to the **Primary Role** section.
2. Click on "**Set up your primary role**" to open the side panel.
3. In the side panel, use the **dropdown menus** to select the relevant role.
4. Once you've made your selection, click "**Request Access**" to submit your request.
5. To set up your **Secondary Role**, follow the same steps as above.

Add Primary Role
You can add a new role from here.

What **function** are you a part of?
PLAN

What **sub-function** are you a part of?
Demand

What **location** are you based in?
APAC - India - Baddi

Select **Role**
Demand Planner Baddi

Request for the selected role will be sent to an approver and access will be provided only once approved

[View Permissions](#)

Cancel Request Access

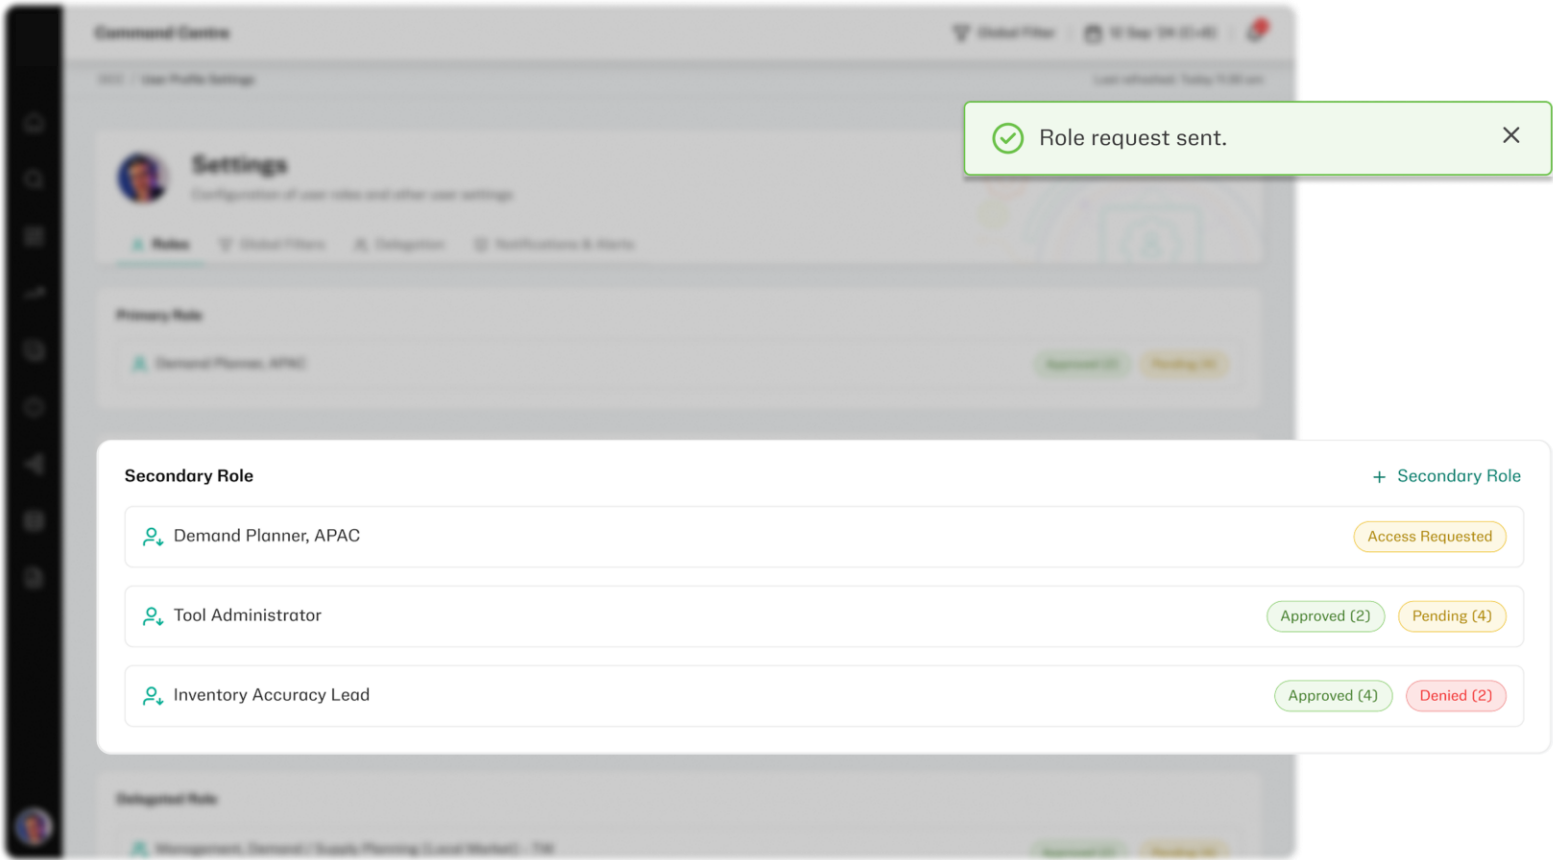

Note: The View Permissions section in the slide-out form provides a quick overview of the tools, reports, and applications that a specific user role can access.

Disclaimers:

A primary role needs to be populated before moving to the secondary role setting

Step 3: Track your Role Request

From the Roles page, you can view the approval status of all your role requests, whether they are Approved, Pending, or Denied.

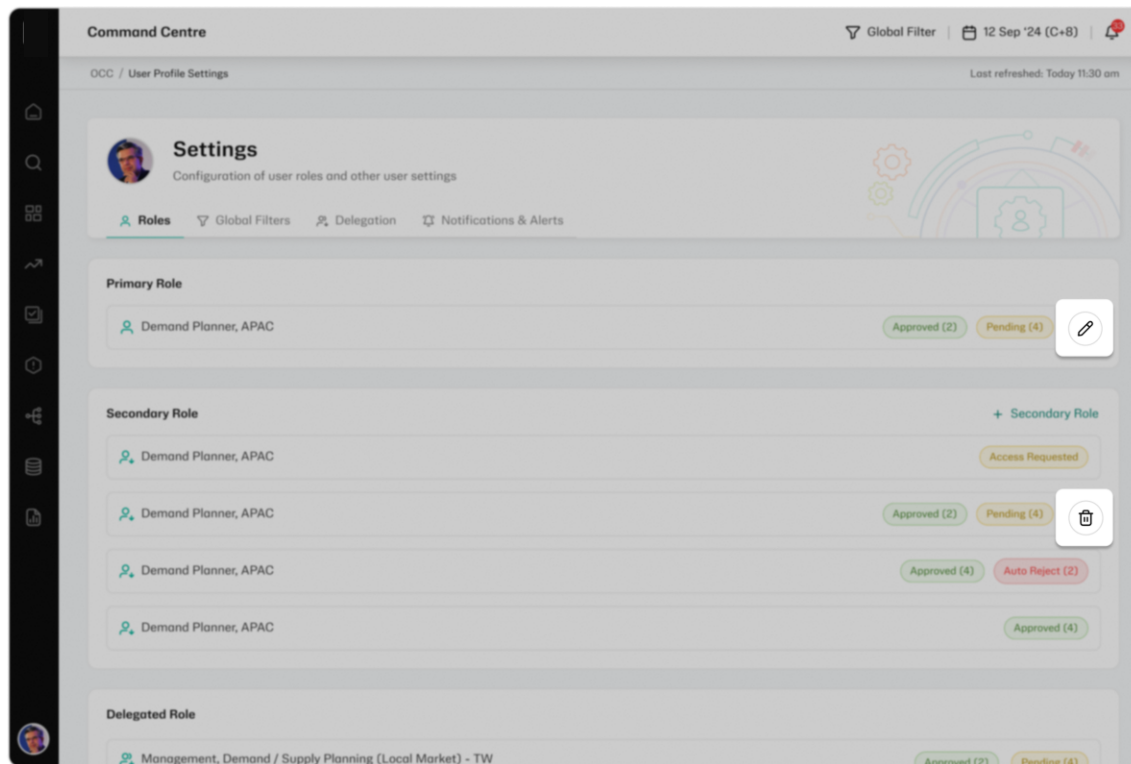

Status Chips:

- Approved
- Pending
- Access Requested
- Denied

Step 4: Edit or Delete your roles

From the Roles page, you can easily manage your role requests.

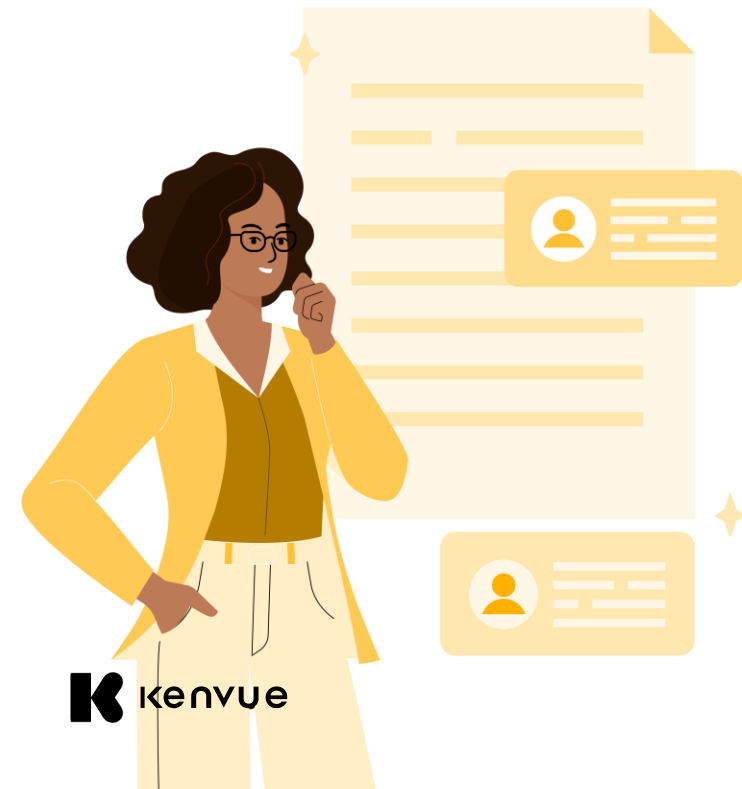

- Hover over a row to reveal available actions.
- You can edit or delete your role request directly from the options shown.

Disclaimers:

- Primary roles cannot be deleted, only secondary roles can be removed.
- A primary role can only be edited if no secondary roles are currently assigned.

Role-Based Access FAQs

Primary Roles

- **Can you have multiple primary roles?**
No. Each user is allowed only one primary role at a time. It's the role assigned to you by the organisation.
- **Can you delete a primary role if you have secondary roles enabled?**
No. A primary role cannot be deleted even while secondary roles are active. They can only be changed,
- **Can I delete/change my primary role?**
You can change it, but only if no secondary roles are currently assigned.

Secondary Roles

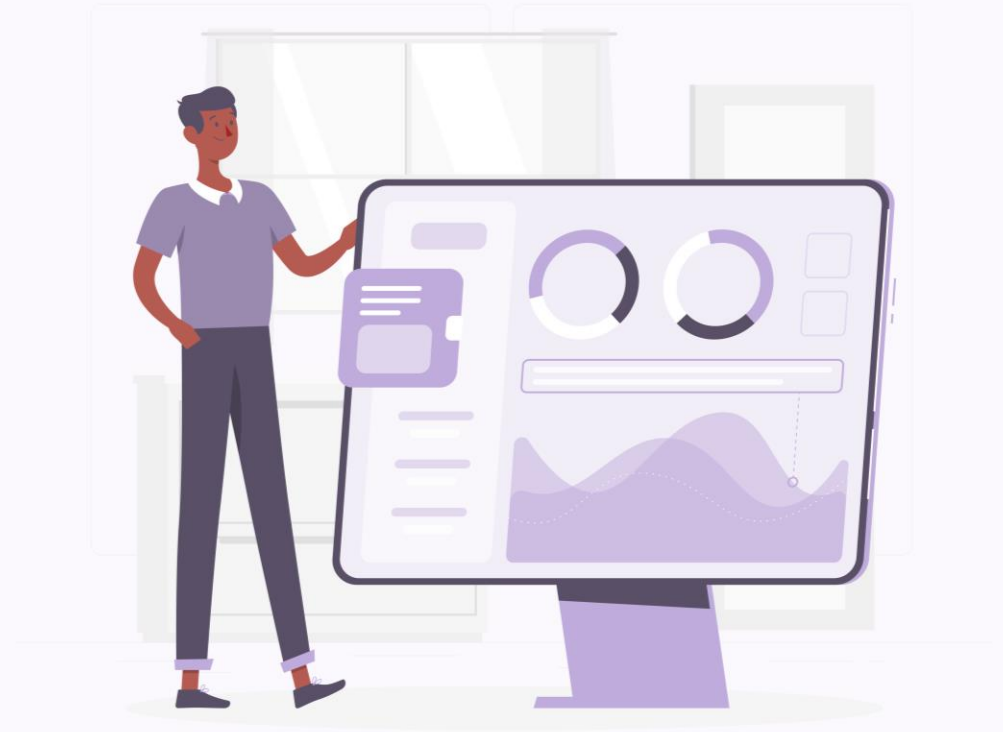

- **Can you have multiple secondary roles?**
Yes. Users can be assigned more than one secondary role.
- **Can I delete a secondary role?**
Yes. Secondary roles can be removed as needed.

Other Queries

- **What if I haven't gotten access to my role even after a week?**
Please submit a new access request to ensure it's processed.
- **How do I know which role to request for?**
Fill in your details accurately. The system will match your request based on your designation and roles & responsibilities (R&R) within Kenvue.
- **What data will I have access to?**
You will be granted access to data that is mapped to the geography associated with your assigned role.

03

Digital Tool Library

Introduction to Digital Tool Library

Access everything you need with the Digital Tool Library a unified platform designed to simplify your workflow. From supply chain analytics to strategic reporting, it brings together the tools, reports, analytics and applications you need to stay informed and act with confidence

Centralized Access

All key tools and reports in one place, no more switching between platforms.

Improved Efficiency

Reduces time spent searching for the right tool or report across platforms

Data Integrity

Ensures consistent access to the latest, most accurate information.

Scalability/Findability

Easily find newly created or updated tools as business needs evolve.

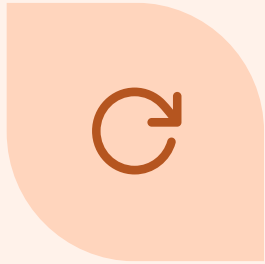

Key Features of Digital Tool Library

The Digital Tool Library is more than just a repository it's a smart workspace that adapts to your usage patterns and operational needs. It helps users stay productive by offering intuitive features that simplify navigation and reduce friction in daily workflows.

Save Favorites

Instant Access to Favourites Save frequently used tools and reports to your favourites for one-click access.

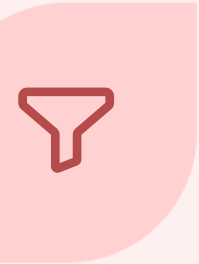

Recent Activity

Quick Recall of Recent Activity Instantly view recently opened items to resume work without retracing steps.

Unified View

A single, organized interface that brings together all essential tools, and resources, serving as a one-stop shop for everything

Smart Filters

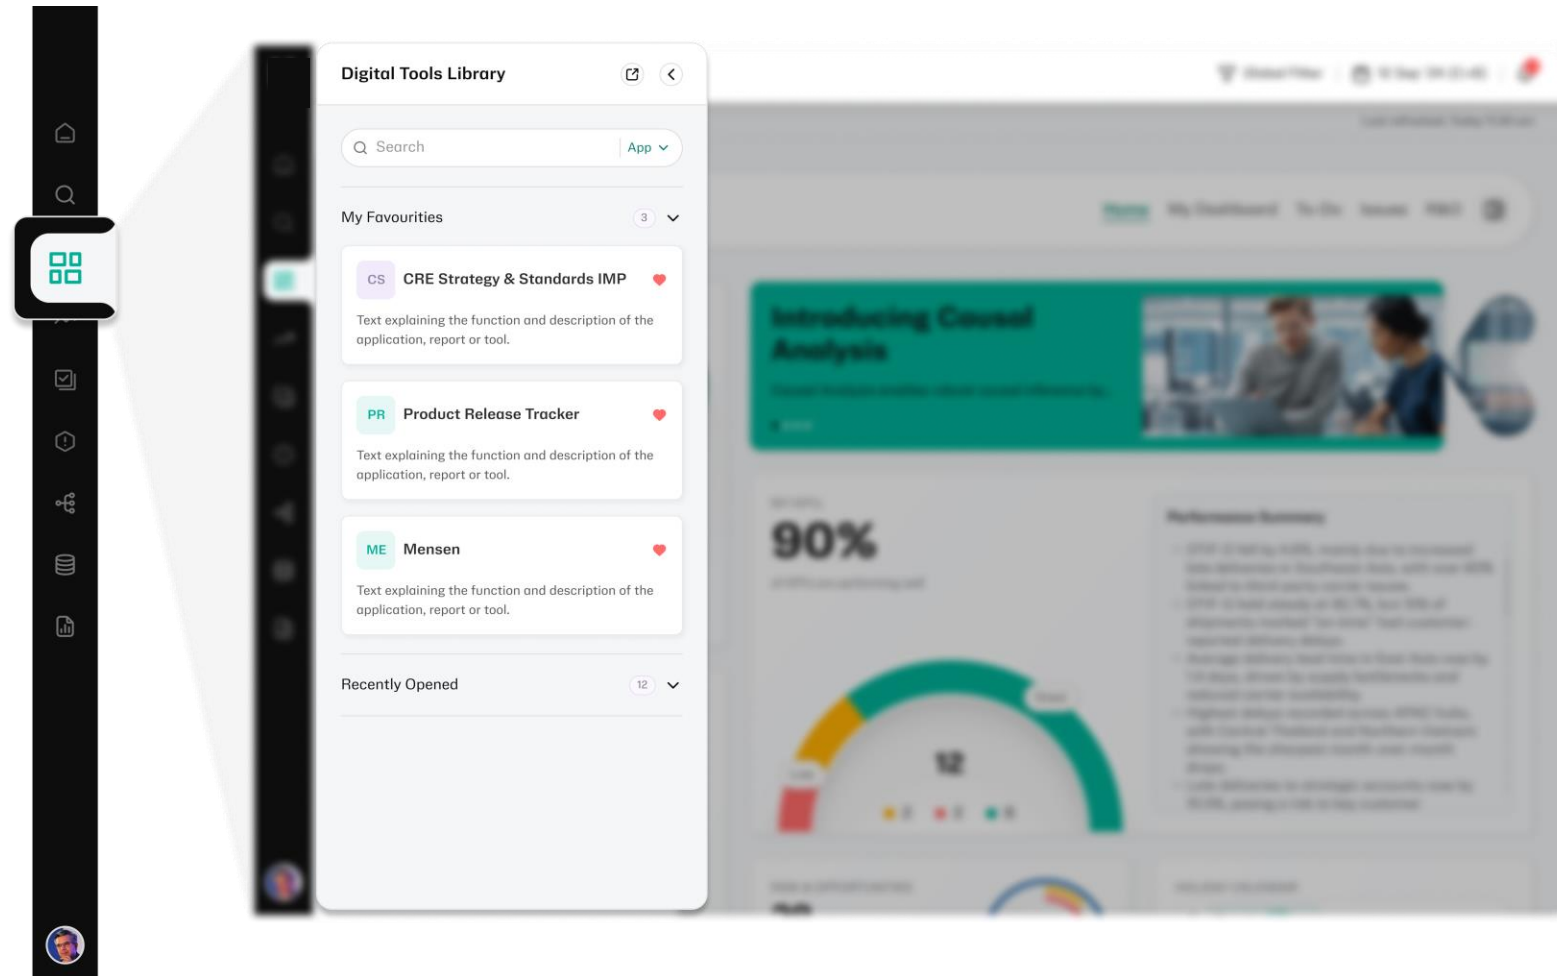

Smart Navigation Filters Seamlessly switch between apps and reports using dropdown filters for a cleaner interface.

Where can I access the reports?

Step 1: Enter the Digital Tool Library

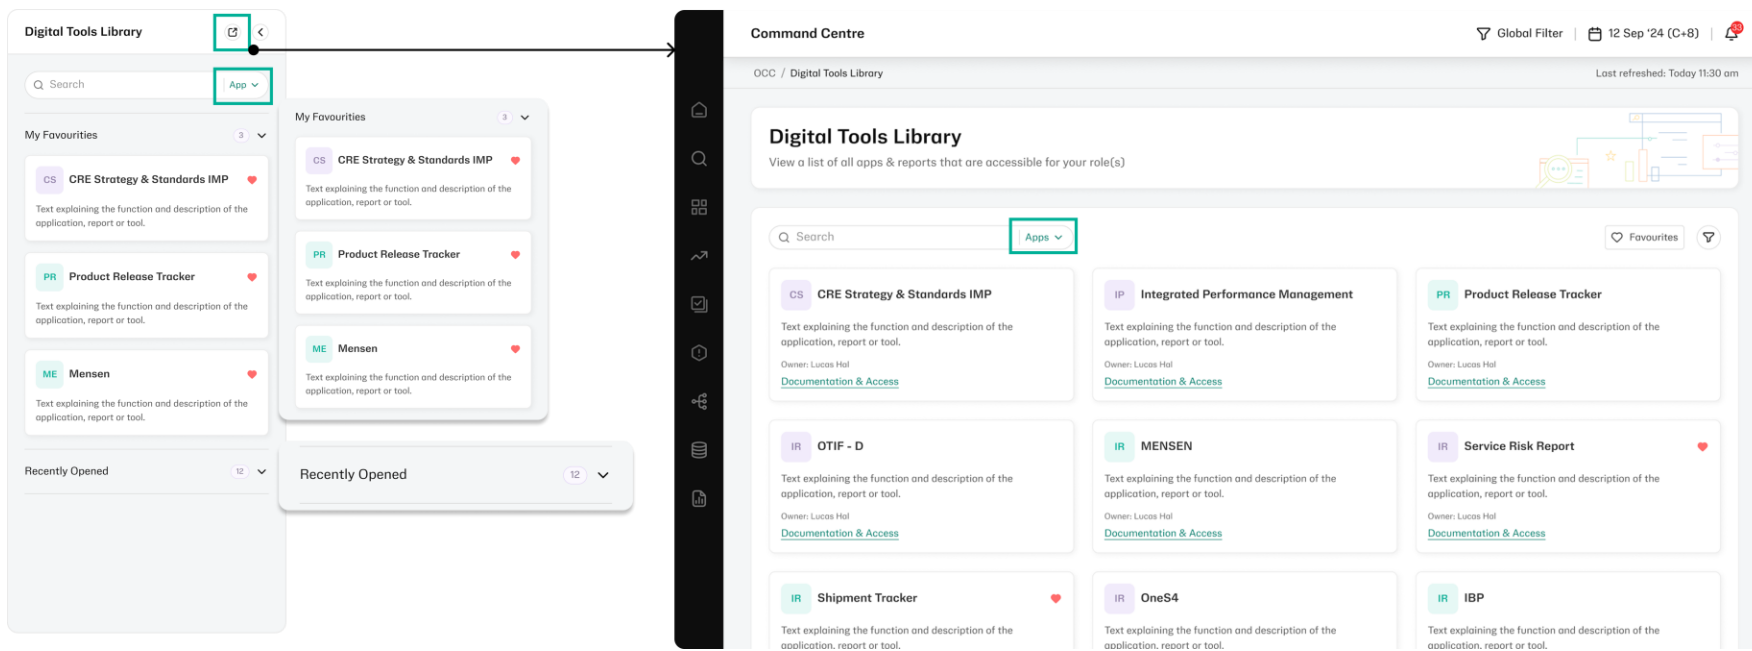

From your **personalized Home page**, use the **side navigation** to access the Digital Tool Library.

Step 2: Navigating through Apps and Reports

At a glance, the side panel provides:

- A view of apps and reports tagged as **favourites**.
- Access to your recent activity under the **Recently Opened** tab.
- An option to **expand the panel** into a full page for a broader view.
- Use the dropdown menu on the search bar to select either **Apps** or **Reports**.

Step 3: Finding the right Report

- In the **search bar**, enter the name of the report: for example, Integrated Performance Management.
- **Click on the report name** to open the corresponding **Power BI report** embedded in the platform

The image illustrates the process of finding a report in the Digital Tools Library. On the left, a search bar contains the text 'Integrated', and a dropdown menu shows 'Report'. Below the search bar, a list of search results is shown, with 'Integrated Performance Management' highlighted. A callout box points to this result, containing the text: 'Text explaining the function and description of the application, report or tool.'

Two example report dashboards are shown on the right. The first dashboard is titled 'Integrated Performance Management' and displays various metrics including IPM Overview (70%), Net Trade Sales (0%), Profitability (67%), Free Cashflow (100%), and Engagement (100%). The second dashboard is titled 'CRE Strategy & Standards IPM' and displays metrics including Facility Reliability (99.99%), FBB Capital VAR to Target (48.40%), and GM AM Program Risk (1.32).

How can I add new reports to OCC?

Governance for Bringing New Digital Tools into OCC

Here's What You Need to Do and How It Works

Tell Us About the Tool

Fill out a short form with details like:

- What the tool does
- How you're using it (if at all)
- Why it is important
- How does it integrate with other tools

01

We'll Review It Together

Your request will be reviewed by the OCC advisory council.

We'll look at:

- How well it fits with OCC goals
- Whether it's technically doable
- How it fits with other tools we use
- Does it fit design standards of OCC.

02

You'll Get a Decision

After the review, you'll hear back with one of these:

- Approved – ready to move forward
- Needs More Info – we'll ask for more details as required.
- Not Approved

03

And it will be Ready to Ship!

If approved:

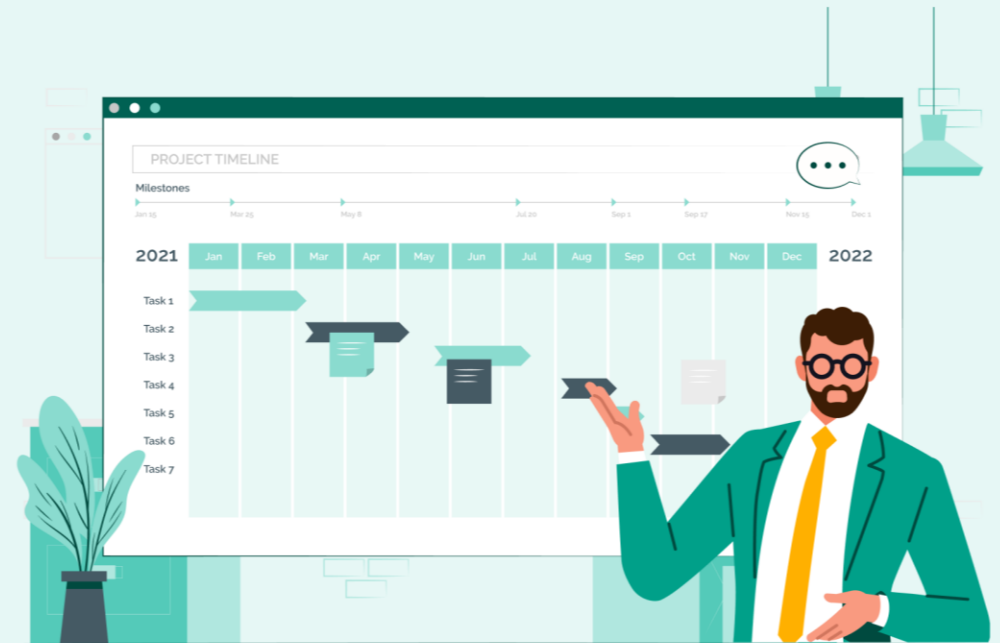

- We'll start integrating the tool
- Define who's responsible, timelines, and support
- Add it to the OCC Digital Tool Library

04

[Tell us what to build next. Click here to fill out the form](#)

04

What's Next?

Here's What's Next

OCC will be launching in multiple phases. Stay tuned for exciting updates and new features coming your way.

Optimization

Users can run simulations to identify the most efficient path, enabling smarter and faster decisions.

Causal Analysis

Get to know the **'WHY'** behind a certain outcome to make better future decisions.

Customizable Alerts & Notifications

Get updates tailored to your role, your priorities for proactive issue resolution.

Global Filters

Filter views across modules, apps, and reports for faster, more focused insights.

Task Management

A clear, prioritized list of daily actions helps users stay organized, focused, and productive.

Performance Management

A smarter way to review performance with standardized metric definitions, scalable designs, updated with new KPIs over the coming months.

Exception Management

Enables proactive risk and opportunity management by acting on system-flagged exceptions

Self-Healing

Automating decisions to resolve deviations and optimize operations intelligently.

Use this link to access OCC and start exploring the platform.

Thank you
